

Is your guest who he claims to be?

Online check-in online – Identity Verification – KYC – Onboarding
Liveness Detection - Document Validation – Access control - Biometry

NeoCheck® makes sure that the guest can remotely check-in and out of your hotel, easily and safely. We validate that the person is the legitimate carrier of the document presented. With a document capture from the client's smartphone, the hotel will have all the information on its PMS.

What needs does NeoCheck's platform cover?

Those related to saving time and increasing security in online check-in processes, fully compatible with the GDPR. We can also add access control by facial recognition simply by adding a capture of the guest's face to the process.

Why NeoCheck?

- Check-in and check-out of your clients remotely and in real time.
- Where and when you would like to: mobile, web or in person.
- We help you to migrate existing information and we provide all required tools to implement new processes.
- 15 years of experience in Border Control and Document Forensic technologies at both private and public sector.

Regulation Compliance

- We comply with Spanish and European regulations, including the GDPR.
- We facilitate information procedures for the authorities and checking with control lists.
- ISO 9001:2015 (QA), 14001:2015 (MA) y 27001:2013 (SI).

Customer loyalty

- Technology and innovation as elements of differentiation
- 43% of guests consider technology a key element in choosing a hotel and 50% value it highly
- 100% of people admit to using their mobile when traveling.

Save time and money

- Less than 60 seconds per transaction.
- Large customer acceptance with average of 25% more efficiency.
- In production since early stage of the project. Immediate integration with your existing solution.
- Different APIs and SDKs available.

Certified Processes and Solutions

Everything available from mobile
